Internet2 VoIP Working Group
Preliminary Meeting Agenda
Monday September 27, 2004
Austin Hilton Room 403

- Introductions and Agenda bashing
- Update on closing down H.323 Gatekeepers in US (Mike Enyeart)
- Workshop updates
  - East Carolina Workshop (Martin Jackson)
  - Recent SIP.edu workshop (Dennis Baron)
  - Intro to the SIP workshop starting Thursday (Walt Magnussen)
- International Coordination (Stephen Kingham)
  - Update on progress in APAN h323-sip Working group
  - National/International peering SIP Domains I would like to ask if someone in the working group could lead peering SIP networks for VoIP traffic between Members, US and International. For example we can offer calls into Australia, and I think we could talk to Taiwan and Singapore to do the same and I am sure there would be at least one US based Member. Work items could include:
    - international co-ordination
    - Routing, such as experimenting with TRIP but could start with static
    - Authentication and key management between Domains
    - Authorization between Domains and experimenting with billing for the interconnects to PSTN
- Emergency Communications BoF (Tuesday 8:30) (Barry Wray)
- SIP.edu spin-off (Dennis Baron)
  - Reasons
  - Proposed working group charter
- Progress report on ad hoc steering committee for Internet2 real time communications (Ben Teitelbaum)
- VoIP WG Futures (All)
  - Become a SIG?
  - If remain working group, what are the goals / deliverables for next 6/18 months?
